MARACAD 2018

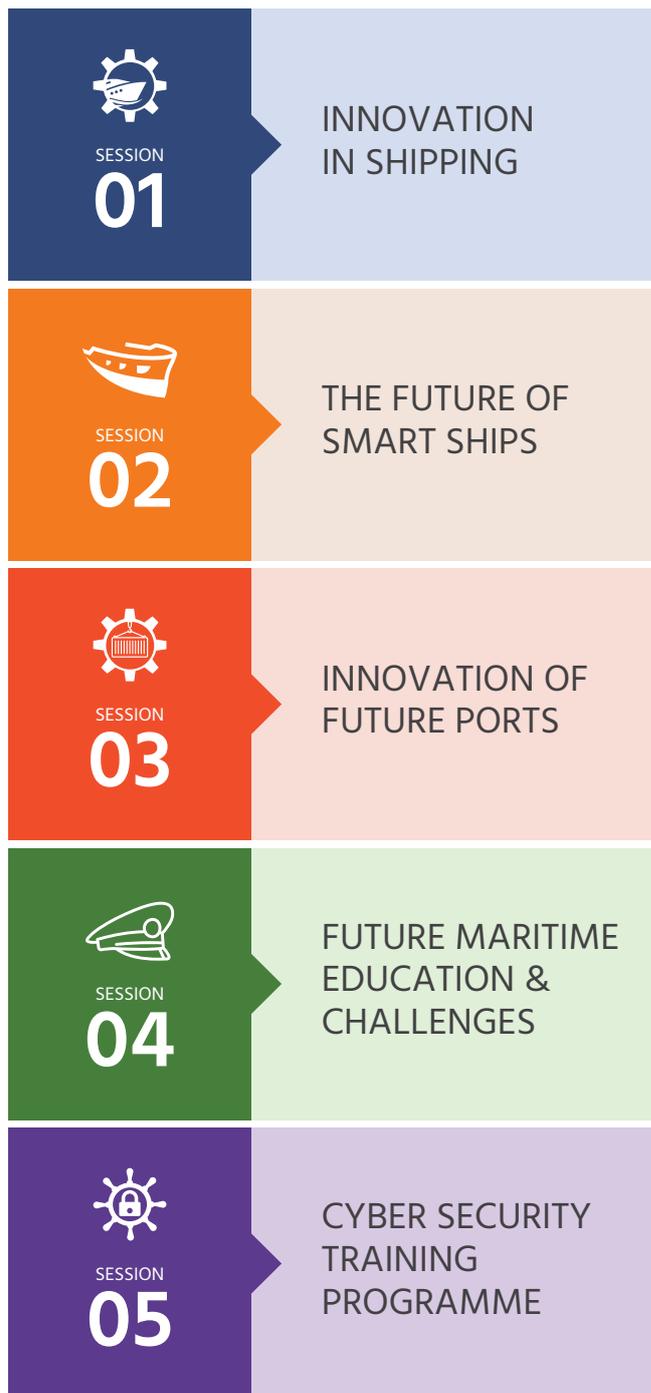

MARACAD 2018 Innovation Conference is the premier event in UAE that aims to engage the Technology & Innovation together with the fundamental maritime elements, including education and training, by facilitating partnering opportunities, that will open doors to better and more agile future for the maritime industry.

The theme for this year's conference is autonomy. With Ports, Shipbuilders, Training centers, Marine academies, and Shipping in general, is heading to the direction of innovation, Laws and regulations must be developed to coop with this technological trend, not to mention information technology and cybersecurity that plays a major aspect in tomorrow's new phase.

We are at the beginning of a global transformation characterized by the convergence of digital, physical, and biological technologies. In today's world, promoting technological innovation in port infrastructure, logistics, and physical connectivity within the maritime sector, among others, is especially important to find new engines of growth. All countries must recognize competitiveness as a key factor when addressing global socio-economic challenges and support, incorporate, and implement innovative operations within their strategic vision.

Hence, this year's event, is being held in conjunction with launch of the new International prestigious (UAE Award for Maritime Creativity and Innovation), which we antedate on becoming an inspiration and motivation for this great industry, as we strive to continue the legacy we all are proud of.

MARACAD Maritime Innovation Awards **2018**

In a world where recession and regulation has profound effects on the industry, MARACAD believes it is important to recognise those – whether companies or individuals – who change the industry through new ideas, processes, technology or equipment.

Here at UAE, we strongly believe this is a healthy innovative industry with creative, problem-solving people and cutting-edge technology. We have created an event that highlights that.

Maritime Innovation Awards programme will consist of 5 categories looking at the most innovative and forward-thinking projects and people that the industry has to offer and will bring together the best of the port, Design, Construction of Vessels, education and training, shipping, Products Technology sectors.

Excellence in Innovation and Technology

A firm must showcase smart new products or services which approach the everyday in new ways, enhance performance, decrease costs, or spearhead that big change that no one even though they needed until it was made.

- » The entry must detail a product or service or business process that shows genuine innovation.
- » Related to any part of a company's offering, the innovation must demonstrate concrete benefits to the company, its customers or suppliers.
- » The entry for this award must demonstrate the impact the new innovation has had upon the business: Did productivity increase? Did revenues or profitability increase? Did the product set a new internal or industry standard?
