

# IT Developer | Internship

## Internship at ADMA media

Do you see yourself working in a dynamic and international environment? Are you a team-player who is eager to learn new skills? If so, then read on.

- The internship is held at our modern office in Košice, which is a lively student town surrounded by untouched nature in Eastern Slovakia.
- Interns can choose either a part-time or full-time internship organized on a projects basis and lasts 3 months with the option of being prolonged and/or converted to a full-time job or paid internship with no time limitation.

## Our Values

- Being part of our team takes passion, persistence and curiosity. Are you dedicated to your work tasks? Do you push through challenges? Do you believe that exploring new ideas and technologies can lead to great things? If yes, then let's talk business!

## Learning Experience

- This internship is an opportunity to gain valuable work experience, career mentoring and to build a life-long personal and professional network.
- An internship at ADMA media will provide you with the skills to kick-off your career with success. It is going to be a very intense learning experience, getting world-class working habits and using the best available "cloud-based" working tools. You will work in an international team and will be mentored by ex-managers and professionals from Google, McKinsey, Jaguar LandRover, Hewlett-Packard, KPMG, ExxonMobil, etc.

## Responsibilities / Activities

- Build professional websites and microsites from scratch using various PHP modules and coding, working with WordPress and Joomla platforms
- Design all websites in mobile optimized frameworks with special attention to UX/ UI design
- Bring creativity and innovation to the design of both front-end and back-end solutions
- Integration of various e-commerce modules, SEO and online marketing tools etc.

## Requirements

- Student in the field of Computer Science or similar
- Project management, organizational and analytical skills related to working with unstructured datasets.
- Experience supporting and working with cross-functional teams in a fast-paced environment is a plus
- Proven software development experience in PHP and understanding of open source platforms like Joomla, WordPress, Wikis, osCommerce, etc.
- Knowledge of web technologies including HTML, CSS, Javascript, AJAX etc. and good knowledge of relational databases, version control tools, coding documentation and various certifications for developing web services.

## Applications

- New interns start every 4 weeks at the beginning of each month. The earliest start date is November 1st, 2018.
- Please send us your application and any role related questions by email: [internships@admamedia.com](mailto:internships@admamedia.com).
- Note: Due to the high number of applications we receive, we will only respond to applications that match our criteria and expectations. Thank you for understanding.
